

VPN Ohjeet

Download Forticlient. You can download it from this address:

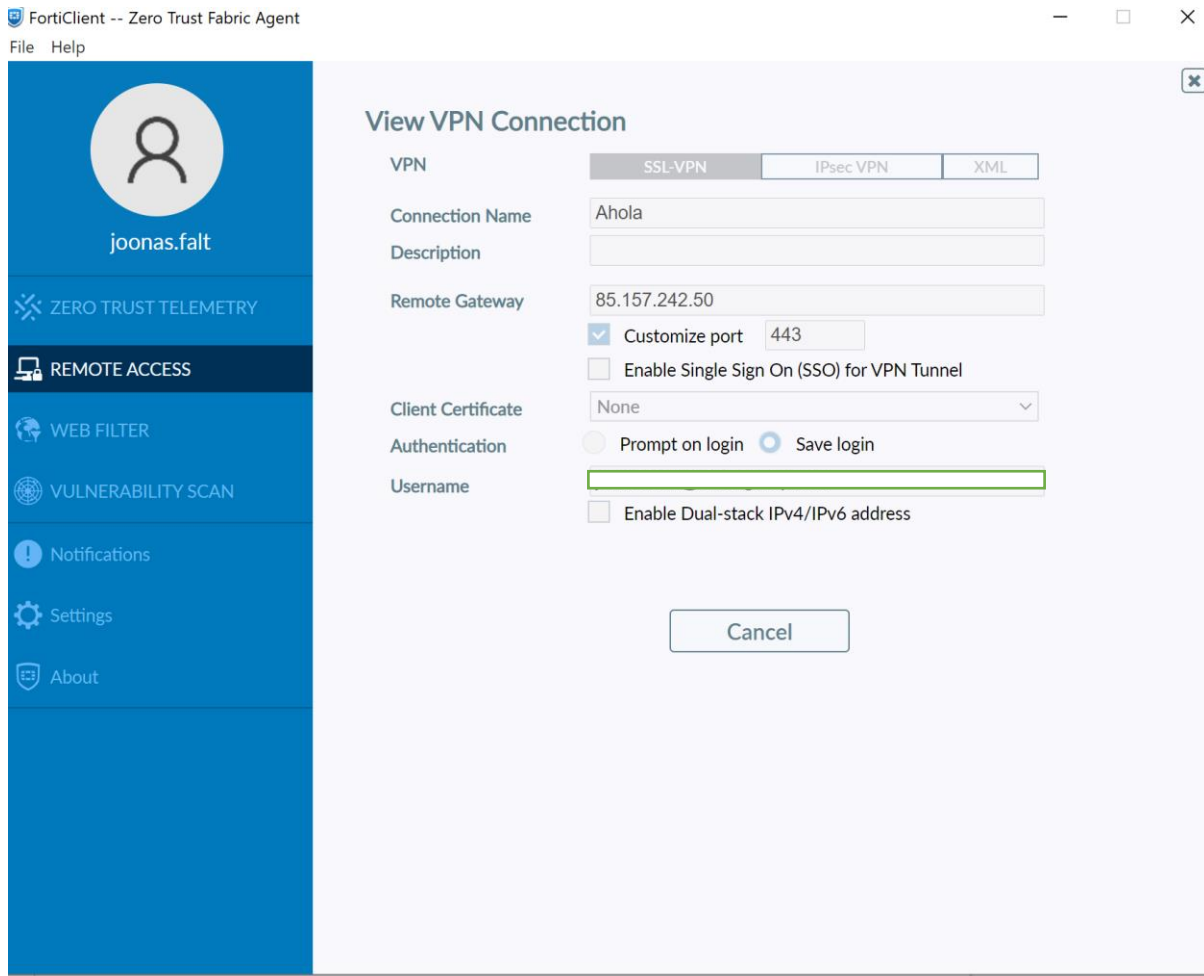

<https://www.fortinet.com/support/product-downloads>

Install Forticlient.

Configure VPN connection by choosing in "Remote access" and clicking "Add a new connection"

Fill in information as seen below. Username is the same as you have for your email.

The screenshot shows the FortiClient -- Zero Trust Fabric Agent application window. On the left is a blue sidebar with a user profile 'joonas.falt' and navigation options: ZERO TRUST TELEMETRY, REMOTE ACCESS (highlighted), WEB FILTER, VULNERABILITY SCAN, Notifications, Settings, and About. The main area is titled 'View VPN Connection' and features three tabs: SSL-VPN, IPsec VPN, and XML. The IPsec VPN tab is active, displaying fields for Connection Name (Ahola), Description, Remote Gateway (85.157.242.50), Client Certificate (None), Authentication (Save login selected), and Username (a green-outlined input field). A 'Cancel' button is at the bottom.

When you have working VPN connection, You can register this app by going "Zero trust telemetry" and writing to the address part:

ems.aholagroup.com

Now you have working Ahola VPN connection
